02/06

A NEW RELEASE ADVENTURE

Join the Angular team this November. v21 brings modern AI tooling, performance updates, and features to supercharge your developer experience.

03/06

ANGULAR MCP SERVER

Supercharge your AI-powered workflows.
New tools for seamless AI integration and
enhanced code generation directly within
your Angular environment.

typescript

[Copy](#) [Download](#)

```
// Example: AI-powered component generation
// MCP Server integrates with your AI agent
ng generate component user-dashboard --ai-prompt="Create a dashboard with charts and a user list"
```

Note: Conceptual API based on MCP (Model Context Protocol) integration.

SIGNAL-BASED FORMS

Meet Signal Forms. A new, streamlined, and reactive approach to form handling that reduces boilerplate and boosts performance.

typescript

 Copy  Download

```
// Conceptual Signal Forms API
const form = createSignalForm({
  username: withRules('', [Validators.required]),
  email: withRules('', [Validators.email])
});

// Reactive value access
const username = form.value.username();
```

Note: Showcases the potential simplicity and reactivity of the new paradigm.

05/06

ENHANCED ANGULAR ARIA

Build more accessible apps effortlessly.

The new ARIA package introduces powerful utilities to ensure WCAG compliance and better user experiences.

typescript

[Copy](#) [Download](#)

```
// New directive for managing focus
<div ngAriaFocus
  role="dialog"
  aria-labelledby="title">
  <h2 id="title">Modal Title</h2>
  <p>Content here...</p>
</div>
```

Note: Illustrates a potential new directive for complex accessibility patterns.

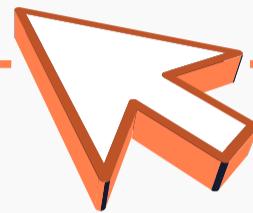

06/06

BUILD FOR THE FUTURE

From AI-powered apps to scalable enterprise systems, Angular v21 provides the tools you need. It's the perfect foundation for modern, high-performance applications.

Don't Miss
The Adventure.
